

**WHY THOUGHTSPOT MSP?****LIGHTNING FAST ANSWERS FOR ALL USERS.****TRUE SELF-SERVICE WITH AI-DRIVEN INSIGHTS.****DESIGNED WITH SMALL AND MEDIUM SIZED BUSINESSES IN MIND.**

## HOSTED DATA SOLUTIONS

As a Managed Services Provider (MSP), SME provides a hosted end-to-end ThoughtSpot powered solution that ensures a fast time-to-value for you and your organization regardless of industry, data size, or user base.

### SIMPLE

We took the simple to use interface and made it simple to deploy. With SME's MSP offering, your resources are focused on the business not the data.

### SCALABLE

Our resources are ready when you are to scale your environment as your needs grow in a way that fits your budget and use cases.

### SECURE

SME uses AWS to host ThoughtSpot's cloud offering, providing multiple layers of security for both the application and data.

ThoughtSpot lets enterprise-wide users ask questions, find insights, and drill infinitely into their company data in seconds.

SME MSP enables small to medium sized companies to leverage those same ThoughtSpot capabilities.
